Re: IUST # 20-90-4139  
Scottish Rite Temple  
Lane County

Dear Mr. Coburn:

The Department of Environmental Quality (DEQ) has completed a review of your January 14, 1992, report regarding the cleanup of petroleum contaminated soil at the above referenced site. Based upon the information in that report, including:

1. One 10,000 gallon fuel oil tank was removed from the site and taken to Sessler's, Inc. for disposal;
2. Approximately 110 cubic yards of contaminated soil was transported to Short Mountain Landfill for disposal;
3. BTEX values for the water in the excavation were below detectable levels;
4. BTEX values for the soils sampled at the soil/water interface were below detectable levels; and
5. A maximum TPH value of 10 ppm for the final round of soil samples collected at this site meets the most stringent numeric soil cleanup standard;

the DEQ has determined that the site appears to be cleaned up in accordance with OAR 340-122-305 through 360, and that no further action is required at this time.

BARBARA ROBERTS  
Governor

750 Front St. NE  
Suite 120  
Salem, OR 97310  
(503) 378-8240

Scottish Rite  
January 15, 1992  
Page 2

However, DEQ's determination will not be applicable if new or undisclosed facts show that the cleanup does not comply with the referenced rules. DEQ's determination also does not apply to any conditions at the site other than the release of the petroleum product specifically addressed in your report.

Please note that pursuant to OAR 340-122-360(2), a copy of your report must be retained until ten (10) years after the first transfer of the property. If you have any questions, please feel free to contact me at (503) 378-8240.

Sincerely,

Bart D. Collinsworth  
Environmental Specialist

- 5/16/90 Filed City of Eugene permit
- 6/20/90 Started decommissioning tank
- 6/21/90 Inspected by City of Eugene
- 6/25/90 Tank removed, took 2 soil tests, one water for TPH and BTEX, wet hole, no apparent contamination
- 7/9/90 Received results of tests, water was below detection limits, soil did not meet level 1 cleanup standards, called lab for HCID and flashpoint
- 7/10/90 Reported contamination to DEQ
- 7/20/90 Faxed results to Leslie Waste Management, received permission to dump 7/27/90
- 7/27/90 Removed approximately 110 yards of contaminated soil to Short Mountain
- 7/27/90 Took 4 soil samples, one on each wall of excavation at soil water interface, for TPH and BTEX
- 8/13/90 Received results of tests, BTEX below detection, TPH below level 1 matrix cleanup (40ppm)
- 8/15/90 Backfilled hole, closed site

Dear Ms. Cheryll Woods:

In answer to your letter of 7-12-90

The C & K Petroleum Equipment Co. has removed the heating oil tank and the hole was not clean from spillage while being filled over the last 35 years. They have been authorized to remove more earth to make the hole meet your standards.

I had understood that MR. Jeff Kayl from C & K was going to contact the DEQ.

There has been no further work done as far as I can see.

Sincerely

Eugene Scottish Rite

Re:LUST: 20-90-4139  
Scottish Rite Temple  
1685 W. 13th  
Eugene, OR 97402  
County: Lane

Dear Mr. Coburn:

The Willamette Valley Regional Office received a report on July 10th, 1990, of a petroleum product release to the soil at 1685 W. 13th, Eugene, OR 97402.

I am enclosing a bulletin titled "Cleanup Rules For Leaking Petroleum UST Systems and Numeric Soil Cleanup Levels for Motor Fuel and Heating Oil." Oregon State Administrative Rules (OAR) Chapter 340, Division 122, related to releases from underground storage tanks. This program calls for several steps of action on your part.

You need to take initial abatement measures and check the site. This includes preventing future releases, monitoring the site for safety hazards, proper removal and disposal of contaminated soils and sampling for the presence of contamination. The complete measures are listed on page 12 of the enclosure. If a site requires action beyond this section of the rules, OAR 340-122-230(d) requires you to pay Department oversight costs.

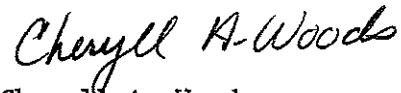

Be advised that work must be started immediately to implement these steps. Any delay can allow the problem to become larger and the eventual cost of cleanup to magnify. If you find during the initial cleanup that groundwater has been impacted, you must immediately notify this office of the situation and discuss a future course of cleanup direction.

Page 2  
Lyman Coburn  
July 12, 1990

By August 1, 1990, you must submit a report to this office summarizing the steps you have taken and all of the information and sample results you have acquired. Depending on the information contained in the report, further steps as spelled out in the enclosed information may also be required.

If you have any questions regarding this matter, please contact me at (503) 378-8240 in the Salem office.

Sincerely,

Cheryll A. Woods  
Environmental Analyst
